DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Klatt (US patent 5243268).

Claim 1, Klatt discloses an electric machine comprising a motor having a stator with at least one coil (28,16), a rotor with at least one coil (38, 36), and a gap between the stator and rotor as shown in figure 7; a capacitor 120 connected in series with the stator coils to form a resonant circuit.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents cited in PTO-892 and PTO-1449 describe other systems for controlling an electric motor including resonant circuits.
